

Get Involved

There are countless ways to get involved with the CURE Epilepsy community!

SHARE YOUR STORY

Submit your story with photo or create a video sharing your epilepsy journey.

BECOME A CHAMPION

Host a run/walk, celebrate a birthday, or create your own unique event raising critical funds for epilepsy research.

JOIN TEAM CURE EPILEPSY

Participate in one of our partnered endurance events or challenge yourself to run, swim, bike, or climb your own.

RAISE AWARENESS

Show your support and inspire others by participating in one of our epilepsy awareness days.

About Us

CURE Epilepsy is the leading non-governmental funder of epilepsy research.

CURE Epilepsy was founded by Susan Axelrod and a small group of parents of children with epilepsy who were frustrated with their inability to protect their children from seizures and the side effects of medications. Unwilling to sit back, they joined forces to spearhead the search for a cure.

26 YEARS
of groundbreaking research

300+ GRANTS
awarded in 18 countries worldwide

\$100M
raised to find a cure

On a mission to find a cure

New Mission Same Aim

Our mission is to fund breakthrough research that will transform the lives of people with epilepsy as we lead the search for a cure.

CURE Epilepsy is a parent-founded, research-focused nonprofit committed to finding a cure for epilepsy. Since 1998, we have invested in cutting-edge research and filled critical funding gaps in foundational science to expand our understanding of the underlying mechanisms of epilepsy and help us discover a cure.

Epilepsy Facts

3.4 MILLION

Americans have epilepsy

1/3

of patients are uncontrolled on medication

50%

of individuals do not know the cause of their epilepsy

Epilepsy affects more people than multiple sclerosis, cerebral palsy, Parkinson's disease, and ALS combined. Yet, despite its prevalence, epilepsy receives less federal funding per person compared to these other brain disorders, which leads to critical gaps in research.

Epilepsy Education

UNDERSTANDING EPILEPSY

An online resource intended to provide people with epilepsy, their caregivers, and their loved ones with educational information they need.

EPILEPSY EXPLAINED

A video series that provides answers to basic questions about epilepsy in easy-to-understand language.

RESEARCH WEBINARS

Interactive presentations, both live and recorded, offering viewers the opportunity to learn and ask questions about the latest advancements in epilepsy research and care.

TREATMENT TALKS

Concise videos providing both clinician and patient perspectives on living with specific epilepsy syndromes or seizure types and the latest treatment options available.
