

Leading Pediatric Neurosciences at AdventHealth for Children

Florida's #1 Kids Neuro Program

AdventHealth for Children has been recognized as the #1 program in Florida and #16 in the nation for pediatric neurology and neurosurgery by *Newsweek*. Our experienced and skilled team of neuroscience specialists provides comprehensive evaluation, treatment, and support for a wide range of disorders — brain tumors, spinal conditions, seizures, sleep disorders, learning difficulties, and more.

Our Specialized Programs

Epilepsy

When a child doesn't respond to at least two anti-seizure medications, their epilepsy is considered "drug resistant" or "intractable." That's when our pediatric epilepsy specialists step in, offering advanced diagnostics, surgical options, dietary therapies such as the ketogenic diet, and comprehensive care to help manage seizures and improve quality of life.

Neuropsychology

Our specialists use advanced evaluations to assess memory, attention, and problem-solving, offering valuable insights that help guide diagnosis, monitor progress, track recovery, and support personalized treatment planning for children with neurological, genetic, or developmental conditions.

Neurology

Neurological conditions in children often require specialized care. Our dedicated pediatric neurology team treats a range of acute and chronic disorders—including epilepsy, neurofibromatosis, brain tumors, and tuberous sclerosis with expert diagnostics, advanced therapies, and support for both kids and families. We also offer specialized care through our Headache Center for children with frequent headaches or migraines.

Neurosurgery

Our pediatric neurosurgery program offers expert care for complex brain and spine conditions. With a team that includes neurosurgeons, neurologists, neuropsychologists, and oncologists, we take a collaborative, personalized approach to diagnosing and treating each child with precision.

Level IV Epilepsy Center

AdventHealth has the only epilepsy center in Central Florida designated Level IV, the highest designation from the National Association of Epilepsy Centers, for both adult and pediatric epilepsy.
