Nitzmari Melendez-Vazquez, MD, is a general neurologist who specializes in treating young patients with an array of neurological issues ranging from headaches to movement disorders, peripheral neuropathy, seizures and more. She joined AdventHealth Medical Group to establish their pediatric neurology practice. Dr. Melendez graduated from Ponce School of Medicine in Puerto Rico, where her clinical and academic achievements earned her Clinical Distinction honors for her third and fourth years of medical school. She next completed her child neurology residency at Augusta University Medical Center in Georgia, serving as Chief Resident in her final year. Her research includes the study of rare immune diseases and infections affecting the central nervous system.
